## Education

B.Sc., Computer Science

McGill University, Montreal

cGPA: 3.85 / 4.00

Expected Graduation: April 2022

## Programming Skills

### Programming Languages

Java

Python

C

JavaScript

Bash

### Frameworks / Technologies

ReactJS

PyTorch

TensorFlow / Keras

NodeJS

Git / GitHub

JUnit5

Rest APIs

Docker

## General skills

### Languages

English

French

Cantonese

## Certifications

Private Pilot License

- Night Rating

- Multi-Engine Rating

## Other Skills

Microsoft Teams

Slack

## Experience

### **Software Developer Intern - Nuance Communications**

MONTRÉAL, CANADA

SEPT 2020 TO PRESENT

- Currently working as a Software Developer Intern working with the NLUaaS team, building Nuance's NLU API using technologies such as **Docker**, **NodeJS**, and more
- Current project is to build features on the tokenizer and the module that trains and authors the NLU models

### **VP Web Developer - McGill Student's Flying Club**

MONTRÉAL, CANADA

JUNE 2020 TO PRESENT

VOLUNTEER POSITION

- Spearheaded the construction and maintenance of a static website using **HTML** and **CSS** to promote the club to new members and potential sponsors.
- Currently developing a **dynamic website** using **React** for front-end.

## Personal Projects

### **Superhero Team Builder**

REACT, REST API

JUNE 2020

- Constructed a superhero team builder multi-page web application where users can create a team of superheroes based around their statistics, and track overall team statistics
- Used the Superhero REST API for information about superheroes from the Marvel and DC universes and then display to the user

### **Fluent-C Programming Language**

PROGRAMMING LANGUAGES AND PARADIGMS

JUNE 2020

- Used C to design a **dynamically typed, interpreted programming language**, with a lexer, parser and a visitor
- Currently supports functionality for variables and custom functions

### **Pathfinding Algorithm Visualizer Web Application**

REACTJS, NODEJS

JUNE 2020

- Created a pathfinding algorithm visualizer **web app** using **ReactJS** and deployed on **GitHub Pages**
- Built as a educational tool to demonstrate algorithms such as **Dijkstra's**, **A Star search**, **Breadth-first search** and **Depth-first search**
- Had over **100 unique visitors** at the peak

### **League of Legends Deep Learning Match Outcome Prediction**

PYTORCH, RIOT GAMES API

MAY 2020

- Constructed, prepared and cleaned a custom dataset of **10 019** matches to train a **binary classification neural network** to predict the outcomes of Ranked matches of League of Legends
- Achieved a **validation accuracy of 97% on post-match data**, and **63% on pre-match data**

### **Personal Website**

HTML, CSS, JAVASCRIPT

DEC 2019

- Used **HTML**, **CSS**, and **JavaScript** to design a **static, responsive website** as an online resume and as the first learning tool in web development
